Skype philipolsson

Profile [www.philipolsson.me](http://www.philipolsson.me)

From Stockholm, Sweden

### Profile

Highly motivated value driven entrepreneur that can bring and deliver both tech and business value. Long-term vision thinking with high quality standards for details and scalable solutions. I always work with passion and products I can really enjoy.

Extensive experience with real-time data, performance improvements, multi-threading, production monitoring, scrum, project management, cloud services and designing architectural solutions.

Self driven developer without a manager for the last 4 years. Never stop thinking of new ideas to solve old problems. 10+ solo web app projects to showcase. I prefer challenges to solve rather than perfect detailed specifications.

### Core skills

Frontend Angular, React, Redux, EcmaScript 6, Websocket, API

Backend Node.js, Java, Express, Spring

Storage MongoDB, Postgresql, Redis, Message Queues

Libraries Material Design, Async, Express, Mocha, Jasmine, Lodash, Gulp

### Full Stack Developer

Full stack means you are not afraid to learn and a drive to get things done

Senior Java and Javascript web developer

Behavioural driven design and Test driven development

Always expect the unexpected and stay up to date

### Product Owner & Agile Coach

Urgency & Importance based priority handling

Breakdown projects and features into small achievable tasks

Successfully delivered features and systems in an agile, focused and stable pace

Continued improvements of scrum and agile processes

### Explorer

Traveled to 50+ countries, constantly interacting with other cultures and never stop learning

Played basketball for 15 years, additional 2 years of coaching and judging

---

Understands 5 languages (Swedish, English, Danish, Filipino and German)  
Next year is always better than the previous one  
Have the next travel booked before travelling, always look forward to new experiences
